PRODUCT MANAGER - B2B DIGITAL PLATFORMS, ECOMMERCE, SAAS AND API PRODUCTS

Product manager and product owner with 15+ years leading enterprise digital products, SaaS platforms, B2B data/API products, eCommerce workflows, customer-facing applications, and analytics-enabled product operations, including 11+ years of product leadership at SunGard. Experienced defining product vision, strategy, roadmaps, OKRs, prioritized backlogs, epics, user stories, acceptance criteria, launch plans, and adoption metrics across complex stakeholder groups. Strong fit for B2B digital and eCommerce product domains that require customer-centric discovery, platform scalability, commercial impact, integration ecosystems, data-driven decisions, AI-aware workflow improvement, and disciplined Agile execution across IT, commercial, engineering, UX, customer-facing, and data teams.

CORE STRENGTHS

- Digital product management, B2B platform strategy, SaaS/API products, eCommerce workflows, and customer-facing applications
- Product vision, 12-month roadmaps, product briefs, OKRs, business cases, prioritization, trade-off decisions, and release planning
- End-to-end product lifecycle ownership from discovery, requirements, and backlog management through launch, iteration, adoption, and optimization
- B2B integration patterns, data syndication, API ecosystems, CRM integration, identity/access modernization, and enterprise workflow automation
- Stakeholder alignment across commercial, sales, support, operations, engineering, QA, UX, data, executive, vendor, and partner teams
- Customer segmentation, market research, partner feedback, product analytics, KPI dashboards, and AI-assisted synthesis/documentation

PROFESSIONAL EXPERIENCE

Business Intelligence Specialist 2024-Present

Blackline Midstream, Portsmouth, NH / Remote

Business intelligence, operations, and commercial analytics for Sea-3, a Blackline Midstream company and the largest propane distribution center in New England.

- **Digital Operations Roadmap:** Partner with sales, operations, and management stakeholders to convert ambiguous commercial and operational needs into prioritized reporting, automation, and workflow-improvement initiatives.
- **Product Metrics And OKRs:** Built repeatable KPI reporting using Python, PowerShell, Excel, and AI-assisted analysis to improve visibility into customer activity, operational performance, exceptions, recurring patterns, and business impact.
- **Customer And Stakeholder Discovery:** Run iterative review cycles with business users to validate needs, refine outputs, improve adoption, and ensure analytics products support real decisions instead of static reporting.
- **Workflow Automation:** Converted ad hoc requests into supportable digital assets, documented workflows, validation checks, and repeatable automation patterns that scale across users and process changes.
- **AI-Enabled Productivity:** Use generative AI to accelerate requirements synthesis, documentation, recommendation lists, data review, and preparation of stakeholder-ready materials while maintaining human review and validation.

Senior Product Manager 2021-2023

Randall Reilly, Boston, MA

Managed Price Digests B2B data API platform, B2C eCommerce application, and FleetSeek lead-management and prospect-profiling platform for commercial markets.

- **B2B Digital Product Ownership:** Owned roadmap, backlog, and product priorities across B2B data/API products, eCommerce workflows, and lead-management capabilities, balancing customer value, commercial growth, scalability, technical feasibility, and operational risk.
- **Product Vision And Roadmap:** Translated product strategy into roadmap themes, prioritized initiatives, epics, user stories, acceptance criteria, and release-ready enhancements across customer-facing and internal stakeholder needs.
- **eCommerce And Platform Lifecycle:** Managed customer-facing application improvements from discovery and definition through launch, QA, stakeholder review, adoption monitoring, and post-release iteration.
- **B2B Integration Ecosystem:** Managed Salesforce CRM integration with FleetSeek Data API, aligning customer/prospect data flows, sales workflows, API capabilities, and product value across commercial teams.
- **Commercial Impact Metrics:** Automated product and API KPI reporting in Python and Excel to track usage, adoption, customer value, product health, and investment decisions.
- **Security And Operational Excellence:** Led Auth0 identity, SSO, MFA, and role-based access modernization, partnering with engineering to balance usability, security, implementation complexity, and support impact.
- **Market Differentiation:** Researched commercial vehicle safety-feature data and created an MVP prototype to validate B2B product value for insurance underwriting, claims adjudication, risk selection, and data-driven differentiation.

Data Consultant / Product Advisor 2020-2021

InfoReach, New York, NY

Advised founders on the launch of iReachDB, a cloud-based data platform for quantitative analysts, data scientists, and enterprise data teams.

- **Product Launch And Packaging:** Helped shape product positioning, demo workflows, customer-facing materials, packaging, and launch assets for an early-stage cloud data platform.
- **Vision To Execution:** Converted founder, customer, and technical needs into product requirements, adoption materials, technical demos, implementation assets, and roadmap-ready enhancements.
- **Cloud And API Enablement:** Created software development kits, demo containers, and Azure-based delivery assets to make the platform easier for technical users to evaluate, integrate, and adopt.
- **Customer-Centric Communication:** Explained complex product capabilities to business and technical audiences, bridging strategy, engineering implementation, customer use cases, and adoption.
- **Secure Digital Access:** Implemented Azure identity architecture for secure access to cloud data and analytic containers, supporting scalable enterprise product delivery.

Technical Product Manager 2015-2020

FIS, Burlington, MA

Built and managed a SaaS-based FAME Economic Data Management Platform used by central banks, statistical agencies, and monetary authorities.

- **Enterprise Product Management:** Owned platform modules, connector strategy, roadmap priorities, backlog refinement, and release planning for high-trust SaaS products used by demanding institutional clients.
- **Agile Execution:** Led transition from waterfall to Agile delivery, acted as product owner in Scrum ceremonies, and aligned engineering, QA, support, implementation, sales, and executive stakeholders around business value.
- **Product Requirements:** Interviewed clients, documented requirements, wrote epics and acceptance criteria, clarified sprint scope, and guided validation for data upload, risk-analysis, reporting, and workflow capabilities.
- **Platform Integrations:** Developed connector strategy across Excel, Tableau, Python, R, and data services, helping technical users integrate the platform into existing analytics and operational workflows.
- **Major Account Delivery:** Guided requirements and validation for a risk-analysis reporting and commercial-bank upload platform tied to a \$16M public-sector annuity opportunity.
- **Operational Quality:** Managed risks, blockers, dependencies, and quality expectations across distributed teams, ensuring releases were practical, supportable, and aligned with client value.

Product Owner / Director, Quantitative Solutions 2004-2015

SunGard, Waltham, MA

Managed financial, economic, and reference-data products on the Forecasting, Analysis & Modelling Environment, including global data dictionaries and taxonomy.

- **11-Year Product Leadership:** Owned product direction, roadmap priorities, and release decisions for financial, economic, and reference-data products used by sophisticated B2B financial-services customers.
- **Platform, Data, And Integration Strategy:** Managed reference-data dictionaries, metadata standards, web services, Excel/R/Python connectors, vendor data feeds, and analytics integrations while balancing client value, platform scalability, and commercial impact.
- **Cross-Functional Delivery:** Led onshore/offshore QA, support, data development, product delivery, vendor, and client-facing teams to translate analytical workflows into requirements, adoption improvements, and supportable enterprise product capabilities.

ADDITIONAL EXPERIENCE

- Founder and President, AgentWare: raised Series A funding, established partnership with FAME, led media and analyst events, and sold platform to SunGard.
- Director, Product Management, FactSet Research Systems.
- Corporate Finance Analyst, Piper Jaffray.

EDUCATION

Bachelor of Science, Economics, Brigham Young University
